

## Introducing Terminology for Population Level Interventions

**DATE:** Wednesday, April 3, 2019

**TIME:** 2:00 pm – 3:30 pm EST

**CPEU:** 1.5

**Description:** Members from the Nutrition Care Process Research Outcomes Committee's Population Level Nutrition Task Force (PLN TF) will provide attendees with an update made to the Nutrition Care Process Terminology (NCPT) that includes a new population based nutrition action domain added to the intervention terminology. The origin of this terminology are discussed along with the importance of each category included under this domain in the intervention section. This will be highlighted with the use of case studies. Finally, further expansion of the terminology and collaboration with the public health sector is emphasized as this terminology continues to develop.

**Moderator:** Amy Headings PhD, RD, LD

**Presented by:**

- Marsha Spence, PhD, RDN
- Kerri Cuthbert, RD

**Learning Objectives:**

1. Identify the new domain added to Nutrition Intervention terminology (population based nutrition action) and describe how the domain fits within the Nutrition Care Process.
2. Discuss the new electronic Nutrition Care Process (eNCP) terms used to describe population-based nutrition interventions, as well as the need and potential uses for the advancement of practice and informing evidence-based strategies.
3. Apply the new domain 'population level nutrition action' terminology using case studies.
